

BEV Landscape Comparison (Price vs. Drive Range)

BEV Insight #1/5

- China now offers hundreds of BEV models across a wide price–range spectrum
- Domestic demand alone is insufficient to absorb this expanding BEV portfolio
- As a result, Chinese BEV exports are structurally redirected toward open markets such as Indonesia and Thailand

Chinese BEVs Global Market Access

BEV Insight #2/5

Restricted / Effectively Closed

United States

- Chinese-origin BEVs effectively restricted

Europe

- High tariffs on Chinese BEVs

India

- High barriers to market entry and localization approval

Open*

Thailand

- ACFTA 0% import duty

Indonesia

- BEV import duty at 0%

Japan

- BEV import duty at 0%

*Market openness ≠ industrial contribution.

- Chinese BEV exports are constrained by asymmetric market access.
- With the US, Europe, and India effectively closed through tariffs and policy barriers, markets that remain open naturally emerge as the primary export destinations.

Thailand BEV Market Participation Patterns

BEV Insight #3/5

Make	xEV Incentive Participation	Excise Duty	CBU Duty	Local Production Phase	Capacity	Investment	Export	Strategic Band
	Yes	2-8%	0%	Operational - ramp-up (since Jul '24)	150k	THB30 bills	Yes	Band A: Commitment & Investment (High Policy Exposure) - BEV localization - xEV incentive (2-8% excise tax) - ACFTA 0% import duty
	Yes	2-8%	0%	Operational - limited models (since May '25)	100 -> 200k	THB10 bills	Yes	
	Yes	2%	0%	Scheduled (from early '26)	80k	THB5 bills	Yes	
	Yes	2-8%	0%	Operational - ramp-up (since Jul '24)	50 -> 100k	THB2.3 bills	Yes	
	No	8%	0%	No local production	-	-	-	Band B: Market access without localization commitment - No BEV localization - No xEV incentive (8% excise tax) - ACFTA/AKFTA 0% import duty
	No	8%	0%	No local production	-	-	-	
	No	8%	0%	No local production	-	-	-	
	No	2-8%	0%	No local production	-	-	-	
	No	8%	40%	No local production	-	-	-	Band C: Structural tariff disadvantage - No BEV localization - No xEV incentive (8% excise tax) - MFN 80 -> 40% import duty
	No	8%	40%	Contract assembly only (EQS500)	-	-	-	

Memo: This is not a market share analysis. It is a policy-structure view of BEV participation in Thailand.

- In Thailand's BEV market, policy engagement has become a defining strategic variable.
